

Workshop Job Card MVP - Revised Wireframes and User Flows (V2)

This revised document updates the earlier wireframes with the requested changes:

- ****Admin panel expanded**** to support full workshop profile setup
- ****Legacy software import engine enhanced**** with auto-alignment of rows, columns, tabs, and mapping templates
- ****New role added:**** Parts Manager
- ****Job card complaint capture expanded**** to support icons, text, audio, and video
- ****Parts workflow expanded**** for ordering, receiving, dispatch, and availability control

This remains a ****single-tenant MVP****, designed so multi-tenant SaaS can be added later.

1. Global navigation model

Role-based home routing

- ****Admin**** -> Admin Dashboard
- ****Manager**** -> Manager Dashboard
- ****Advisor**** -> Advisor Dashboard
- ****Mechanic**** -> Mechanic Jobs
- ****Parts Manager**** -> Parts Dashboard
- ****Accounts**** -> Estimate / Billing Queue

Global layout rules

- Top bar: workshop logo, current user, notifications, sync indicator, quick search.
- Left menu on desktop/tablet for Admin, Manager, Parts Manager.
- Bottom tab navigation on phone for Advisor and Mechanic.
- Global quick search supports:
 - registration number
 - customer mobile
 - customer name
 - VIN
 - job card number
 - part request number
 - supplier order number

Universal status colors

- Draft = gray
- Open = blue
- In Progress = orange
- Waiting for Parts = purple
- Ready for Review = teal
- Ready for Delivery = green
- Closed = dark gray
- Reopened = red
- Legacy Imported Read-Only = black outline badge

Parts status colors

- Requested = amber
- Approved = light green
- In Stock = green
- Ordered = blue
- Partially Received = indigo
- Dispatched to Floor = bright green
- Used = dark green
- Rejected = red
- Cancelled = gray

2. Updated role definitions

Role	Main purpose	Pricing visibility	Orders parts	Dispatch parts	Manage users
--- ---	---: ---	---: ---	---: ---	---	---
Admin	Full system control	Yes	Yes	Yes	Yes
Manager	Workshop operations and pricing	Yes	Approve	View/coordinate	No
Advisor	Front desk intake and job creation	Limited/no pricing	No	No	No
Mechanic	Work execution	No	Request only	No	No
Parts Manager	Procurement, receiving, availability, dispatch	Limited/controlled	Yes	Yes	No
Accounts	Billing/export later	Yes	No	No	No

3. Updated page flow diagrams

Advisor flow diagram

+-----+
| [Save Draft] [Continue to Photos]                 |
+-----+
```
```

---

## ## 4.5 Intake photo capture

```text

```
+-----+
```

| | |
|--|--------------------|
| Intake Photos | |
| [Front] | [Capture / Retake] |
| [Front Left] | [Capture / Retake] |
| [Left Side] | [Capture / Retake] |
| [Rear Left] | [Capture / Retake] |
| [Rear] | [Capture / Retake] |
| [Rear Right] | [Capture / Retake] |
| [Right Side] | [Capture / Retake] |
| [Front Right] | [Capture / Retake] |
| [Interior Optional] | [Capture] |
| [Dashboard Optional] | [Capture] |
| [Add Walkaround Video] [Continue to Complaint Capture] | |

4.6 Complaint capture

```
```text
```

Complaint Capture	
Quick Complaint Icons	
[Service]	[AC] [Body] [Electrical] [Accessories]
[Brakes]	[Suspension] [Noise] [Vibration] [Diagnostics]
Customer Complaint Text	
[_____]	
Advisor Observation	
[_____]	
Internal Technical Note	
[_____]	
Audio Recording	[Start / Stop / Playback]
Video Recording	[Record / Retake / Playback]
Photo Attachment	[Add Photo]
[Save Complaint] [Continue to Signature]	

```
```
```

Rules:

- Complaint can be captured through one or more methods.
- Icons are optional if text/audio/video is provided.
- Audio and video should be attached to the job card record.

4.7 Signature capture

```text

|                                            |  |
|--------------------------------------------|--|
| Customer Signature                         |  |
| Intake Summary Preview                     |  |
| - Vehicle                                  |  |
| - Odometer                                 |  |
| - Complaint Summary                        |  |
| [ Signature Pad Area ]                     |  |
| [Clear] [Save Signature] [Skip if Allowed] |  |

```

4.8 Job card summary

```text

|                                              |  |
|----------------------------------------------|--|
| Review and Create Job Card                   |  |
| Customer Snapshot                            |  |
| Vehicle Snapshot                             |  |
| Intake Notes                                 |  |
| Photo Count: 8                               |  |
| Complaint Inputs: Icons + Text + Audio       |  |
| Signature: Captured                          |  |
| Suggested Tasks:                             |  |
| - General service inspection                 |  |
| - Front brake check                          |  |
| [Edit Intake] [Save Draft] [Create Job Card] |  |

```

5. Mechanic wireframes

5.1 Mechanic jobs list

```text

```

```

10. Updated build priority

Priority 1

- Login
- Advisor dashboard
- New job start
- Existing vehicle preview
- Create customer
- Create vehicle
- Intake details
- Photo capture
- Complaint capture
- Signature capture

- Job card summary

Priority 2

- Mechanic jobs list
- Mechanic job detail
- Labour window
- Parts window
- Offline sync indicator

Priority 3

- Parts Manager dashboard
- Parts request queue
- Supplier order screen
- Receiving screen
- Dispatch screen

Priority 4

- Manager dashboard
- Job card detail
- Parts approval
- Labour pricing
- Estimate preview
- Close job card

Priority 5

- Admin dashboard
- Workshop profile
- Commercial and tax setup
- Operational setup
- Import profiles
- Smart import alignment
- Validation preview
- Duplicate review
- Audit logs

11. Final revised notes

- The **\*\*Admin panel\*\*** now controls full workshop profile setup, not just users and settings.
- The **\*\*import engine\*\*** should intelligently align legacy software files by rows, columns, and tabs where possible, but final merge decisions remain admin-controlled.
- The **\*\*Parts Manager\*\*** role is now a first-class operational role.
- The **\*\*job card complaint capture\*\*** now supports icons, text, audio, video, and attachments.
- The same structure remains suitable for future Zoho integration and later SaaS conversion.
