

Workshop Job Card MVP - Wireframes and User Flows

This document turns the approved MVP scope into page-level wireframes and end-to-end user flows for the single-tenant workshop app.

1. Global navigation model

Role-based home routing

- ****Admin**** -> Admin Dashboard
- ****Manager**** -> Manager Dashboard
- ****Advisor**** -> Advisor Dashboard
- ****Mechanic**** -> Mechanic Jobs
- ****Accounts**** -> Estimate / Billing Queue

Global layout rules

- Top bar: workshop logo, current user, notifications, sync indicator, quick search.
- Left menu on desktop/tablet for Admin and Manager.
- Bottom tab navigation on phone for Advisor and Mechanic.
- Global quick search supports:
 - registration number
 - customer mobile
 - customer name
 - VIN
 - job card number

Universal status colors

- Draft = gray
- Open = blue
- In Progress = orange
- Waiting for Parts = purple
- Ready for Review = teal
- Ready for Delivery = green
- Closed = dark gray
- Reopened = red
- Legacy Imported Read-Only = black outline badge

2. Page flow diagrams

Advisor flow diagram

3. Advisor wireframes

3.1 Advisor dashboard

****Purpose:**** fast intake start.

```text

```
+-----+
| Logo | Advisor Dashboard Search [____] |
+-----+
| [New Job Card] [Search Vehicle] [Search Customer] [Due Today]|
+-----+
| Recent Vehicles |
| - HR26EN8059 BMW X3 Last visit: 07-06-2026 |
| - DL8CAS5263 Hyundai Creta Last visit: 06-06-2026 |
+-----+
| Jobs Awaiting Intake Completion |
| - JC-1024 Toyota Corolla Altis Missing signature |
+-----+
```

```

****Actions:****

- New Job Card
- Search Vehicle
- Resume draft intake

3.2 New job card start

```text

```
+-----+
| Start New Job Card |
+-----+
| Registration No [_____] [Search] [Scan Plate] |
| Customer Mobile [_____] [Search] |
| VIN / Chassis [_____] [Search] |
| [Create New Customer + Vehicle] |
+-----+
| Recent matches / quick picks |
+-----+
```

```

****Behavior:****

- Registration number search first.
- If exact match found, show customer + vehicle card with last 3 to 5 jobs.
- If not found, move to create customer flow.

3.3 Existing vehicle + customer preview

```text

|                                                         |  |
|---------------------------------------------------------|--|
| +-----+                                                 |  |
| Vehicle Found                                           |  |
| +-----+                                                 |  |
| Reg No: HR26EN8059                                      |  |
| BMW X3   Petrol   Blue metallic   VIN: --               |  |
| Current Owner: Rakesh Gupta   9810054629                |  |
| Last Odometer: 10800                                    |  |
| +-----+                                                 |  |

| -----+ |                |            |                   |                    |

---

## ## 8. Shared modal dialogs

### ## 8.1 Duplicate warning modal

```text

| | |
|--------|--|
| -----+ | |
| | Possible duplicate found |
| -----+ | |
| | Existing vehicle with same registration found. |
| | HR26EN8059 BMW X3 Rakesh Gupta |
| -----+ | |
| | [Open Existing] [Continue Anyway] [Cancel] |
| -----+ | |

8.2 Read-only legacy badge modal/info

```text

|        |                                              |
|--------|----------------------------------------------|
| -----+ |                                              |
|        | Legacy Imported Record                       |
| -----+ |                                              |
|        | This job card was imported from the previous |
|        | system and is read-only by default.          |
| -----+ |                                              |
|        | [Close]                                      |
| -----+ |                                              |

### ## 8.3 Offline sync conflict modal

```text

| | |
|--------|------------------------|
| -----+ | |
| | Sync conflict detected |
| -----+ | |

| |
|---|
| Manager updated pricing while offline changes were pending from mechanic notes. |
| Pricing kept from Manager. Notes were merged. |
| [OK] |

9. Key page-level validations and buttons summary

Advisor critical validations

- customer must exist before vehicle save completes
- vehicle must exist before job card creation
- odometer required if workflow toggle enabled
- minimum photos required if enabled
- signature required if enabled

Mechanic critical validations

- can save labour/parts offline
- cannot view or edit pricing fields
- cannot close job card

Manager critical validations

- only manager/admin can change part/labour prices
- close job checks workflow prerequisites

Admin critical validations

- import cannot proceed without mapping and preview
- probable duplicates cannot auto-merge without review

10. Build priority from these wireframes

Priority 1

- Login
- Advisor dashboard
- New job start
- Existing vehicle preview
- Create customer
- Create vehicle
- Intake details
- Photo capture
- Signature capture
- Job type selection
- Job card summary

Priority 2

- Mechanic jobs list
- Mechanic job detail
- Labour window
- Parts window
- Offline sync indicator

Priority 3

- Manager dashboard
- Job card detail
- Parts approval
- Labour pricing
- Estimate preview
- Close job card

Priority 4

- Admin dashboard
- User management
- Feature flags
- Workflow settings
- Import dashboard
- Column mapping
- Validation preview
- Duplicate review
- Audit logs

11. Final wireframe notes

- Keep the Advisor flow on as few screens as possible to reduce intake time.
- Mechanic screens must be large-button and low-text for workshop floor use.
- Manager screens should prioritize fast approvals and visibility of pending parts.
- Import screens must feel safe and explicit, never automatic or hidden.
- The same visual system should be reused later for multi-tenant branding.
